## World Hardfacing Challenge 2020

Enter for a  
chance to win a  
Fronius  
Transpocket  
180

Every day, we work together with customers to find solutions by using hardface welding, which will reduce wear and make equipment perform better and last longer regardless of the working conditions. Discovering new and better ways to keep our industries running without costly interruption is our mission every day. **We want you to send us your problem and we will find a solution.**

A team of Postle Hardfacing Specialists will evaluate all the challenges submitted. We will work closely with each of you to provide a solution to the problems that you encounter. At the end of the contest, we will then choose our favorite “Challenge” and publish the details. Our winner will receive a new Fronius Transpocket 180. **At a minimum, everyone will receive a recommendation to solve your wear challenge. Deadline for entering is December 1, 2020 and the winner will be announced January 4, 2021.**

Go to the following web page on our website:

[http://www.hardfacetechnologies.com/postle\\_hft\\_btsp/world\\_hardfacing\\_challenge.php](http://www.hardfacetechnologies.com/postle_hft_btsp/world_hardfacing_challenge.php)

Complete the World Hardfacing Challenge 2020 form. Please describe your wear problem in as much detail as possible. Some things to include...what the part does, base material, what causes the abrasion and or impact. What strategy or products are you currently using to reduce wear? What type of welding equipment is available to use? What type of wear life are you current seeing? What type of wear life do you want to achieve?
